## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Miller (US 6,094,746).

Miller discloses a necktie knot simulator (10) including a one piece shell member having an inverted triangular front surface (12), left and right side walls (18, 20), a horizontal top wall (30), two side apertures (28a, 28b) located at the upper end of each side wall being separated by the horizontal wall and a bottom aperture (28) is located at the lower end of each side wall as shown in figures 1-4. Also, the shell member is defined by three rear surface panels as shown in figure 9. Further, it is inherent that the side wall apertures having a necktie attached thereto is separated by a sufficient distance so that the apertures can be covered by a shirt collar as shown in figure 6. In addition, the rear of the shell is generally open at the rear so that the necktie can be inserted through the apertures as shown in figures 8-13. Furthermore, the apertures and the bottom aperture are of sufficient diameter and length to provide frictional resistance when a necktie is inserted therethrough, col. 4, lines 52-57.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Miller.

With regard to claim 2, it would have been obvious to one skilled in the art that the front surface of shell member can be provided with any decorative item thereon as a matter of design choice.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.
